5.1 Maps and/or spatial data

Select which map type(s) you will attach with your form. Note: We will decline / return forms (as applicable) if you do not provide sufficient information for this question.	☒ An ESRI shapefile with the following properties *(preferred)* • Geometry type: polygon shape • Coordinate system: Geocentric Datum of Australia (GDA) 1994/2020 (geographic latitude / longitude) • Datum: GDA 1994 / GDA 2020 (please specify which was provided) ☐ An aerial photograph or map with a north arrow, clearly marking the proposed clearing area Note: • An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj • You must provide an ESRI shapefile if the form requires an assessment under an *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
  Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for purpose permit applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

  1 hectare = 10,000 m^2 — Area of circle = 3.14 x $radius^2$
  1 acre = 0.4 hectares / 4,000 m^2 — Area of a rectangle = length x width
  1 tree = 0.01 hectares / 100 m^2 — Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	**0.27**	**Note: applicant changed to 0.33 hectares**
Footprint of clearing (hectares) (purpose permit only)		
Number of individual trees to be removed		

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Extension of current winery ring road, opening central winery area.
Specify what the final land use will be after clearing	As current, wine production facility.

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing/bulldozing.

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1 February 2023 End date: 30 June 2023

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	Current proposed area to be cleared has been defined as in a predominantly "completely degraded" condition, with almost all the original native vegetation structure being lost. There are no threatened or priority flora present. Area to be cleared has been defined as the minimum required to allow the construction of the road extension including a 10 meter fire break perimeter for the road. The western location was selected as being the logical expansion area due to its proximity to the main winery plant (refrigeration and electrical). Expansion to the eastern location was ruled out due to its higher water table and greater construction and drainage concerns. The reduction of the fire risk, associated with the removal of the mostly non-native vegetation on the winery western perimeter was also seen as concurrent benefit to the expansion of the winery

	ring road. There was no engineering solution identified that would both expand the western winery ring road, and not impact in the required removal of the described vegetation. The total area to be cleared was kept to the minimal amount, to allow the winery ring road expansion, as well as reduce the costs associated with the clearing.

Part 6 – Offset

Do you want to submit a clearing offset proposal with your form? For more information on environmental offsets, refer to DWER's website and *Fact Sheet 11: Environmental offsets for native vegetation clearing permits*.	☐ Yes ☒ No
If 'Yes' – please complete and attach Appendix A of the *Clearing of native vegetation offsets procedure* guideline as a supporting document for your form.	☐ Appendix A attached

Part 7 – Surveys for assessments (IBSA and IMSA)

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) *Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments* (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

Part 8 – Assessment Bilateral Agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a **'controlled action'** before you submit this form.

For further information, see DWER's website guidance on the assessment bilateral agreement.

For all other clearing activities, select 'Department of Water and Environmental Regulation'.	☐ Department of Mines, Industry Regulation and Safety ☒ Department of Water and Environmental Regulation

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by s.37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as 'a proposal likely, if implemented, to have a significant effect on the environment'. If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.

Has the proposed clearing or any related matter been referred to the EPA?	☐ Yes Enter details: ☒ No – complete question below.
If 'No' – do you intend to refer the proposal to the EPA?	☐ Yes – intend to refer (proposal is a 'significant proposal') ☐ Yes – intend to refer (proposal will require a s.45C amendment to the current Ministerial Statement) ☐ No – a current valid Ministerial Statement applies Enter Ministerial Statement number: ☒ No – not a significant proposal

9.2 Other approvals – pre-application scoping (DWER forms only)

Have you had any pre-application/ pre-referral/ scoping meetings with DWER about any planned applications?	☐ Yes Enter details: ☒ No

9.3 Other approvals – works approval, licence or registration (Part V Division 3 of the EP Act)

Have you applied or do you intend to apply for a works approval, licence, registration or an amendment to any of the above, under Part V Division 3 of the EP Act or Environmental Protection Regulations 1987 (EP Regulations)? It is an offence to perform any action that would cause a premises to become a prescribed premises of a type listed in Schedule 1 of the EP Regulations, unless that action is done in accordance with a works approval, licence, or registration. For further guidance, see DWER's *Procedure: Prescribed premises works approvals and licences* and *Guideline: Industry Regulation Guide to Licensing*.	☐ Yes Application reference: ☐ No – a valid works approval or licence applies Works approval or licence number: ☐ No – a valid registration applies Registration number: ☒ No – not required
