Application for new permit or referral to clear native vegetation

This is the form to submit a referral of proposed clearing or apply for a clearing permit under Part V of the *Environmental Protection Act 1986* (EP Act).

Before you submit this form, please check you have completed all the fields for the form type and fully prepared any required supporting documents (maps etc.). The Department of Water and Environmental Regulation (DWER) or Department of Mines, Petroleum and Exploration (DMPE) will return/decline any forms that are not correctly completed.

To find out more about the stages of assessment for clearing permit forms, see the *Procedure: Native vegetation clearing permits*.

Part 1 – Form type

Select your form type. **Note**: Where appropriate in this form, and unless stated otherwise, the terms 'application' and 'applicant' also mean 'referral' and 'referrer' respectively.	☐ Referral of proposed clearing (section 51DA of the EP Act) ☐ Application for an area permit (section 51E of the EP Act) ☒ **Application for a purpose permit** (section 51E of the EP Act)
Which department are you submitting this form to? If the clearing is for mineral and petroleum activities authorised under the *Mining Act 1978*, the various petroleum Acts, and/or a State Agreement with areas covered by either mineral or petroleum tenure granted under one of the abovementioned Acts, select 'Department of Mines, Petroleum and Exploration'. For all other clearing activities, select 'Department of Water and Environmental Regulation'.	☐ Department of Mines, Petroleum and Exploration ☒ **Department of Water and Environmental Regulation**

Part 2 – Applicant details

2.1 Applicant name

For area permits:

If granted, the name(s) of (all) landowner(s) will be listed as 'permit holders' on the permit.

For purpose permits:

If granted, the name(s) of (all) applicant(s) will go on the permit.

☐ Applying as an individual – complete the following:

Title	☐ Mr ☐ Mrs ☐ Ms ☐ Other:	
Name(s)		

☒ **Applying as a body corporate or other entity formed at law – complete the following:**

Name	Ngarluma Green Energy Pty Ltd
Australian Company Number (ACN)	0690 276 334

☐ Applying as a government entity (e.g. government department, local government authority, or other statutory body)

Name	

2.2 Applicant contact details

Provide the contact details for the above (primary contact).

Title	☐ Mr ☐ Mrs ☒ Ms ☐ Other:		
First name	[redacted]		
Last name	[redacted]		
Position	[redacted]		
Company name	[redacted]		
Phone number		Mobile	[redacted]
Email address	[redacted]		

2.3 Applicant contact postal details

Provide the postal address for the above individual, body corporate or local government authority (primary contact).

Address line 1	[redacted]
Address line 2	

Suburb	[redacted]		
State	[redacted]	Postcode	[redacted]

2.4 Applicant contact – registered business address

If applying as a company, incorporated body, local government authority or public authority, please also supply the registered business office address.

Address line 1	[redacted]		
Address line 2	[redacted]		
Suburb	[redacted]		
State	[redacted]	Postcode	[redacted]
Phone number	[redacted]	Mobile	

2.5 Electronic correspondence consent

DWER/DMPE prefer to send all correspondence via email. We request that you consent to receiving all correspondence relating to instruments and notices under Part V of the EP Act via email. Please indicate your consent in this section of the form.

I consent that all written correspondence between myself (the applicant) and DWER/DMPE (as applicable) about the subject of this form will be exclusively via email, using the email address provided above.	☒ **Yes** ☐ No

2.6 Contact details for enquiries

If different from the applicant's contact details, enter the contact details of a person with whom DWER/DMPE should liaise with (e.g. a consultant).

Same as applicant's contact details	☐ Yes ☒ **No**

If 'No' – complete the following:

Title	☒ Mr ☐ Mrs ☐ Ms ☐ Other:		
Contact name	[redacted]		
Position (if applicable)	[redacted]		
Company name (if applicable)	[redacted]		
Phone number		Mobile	[redacted]

Email address	[redacted]		
Business or postal address line 1	[redacted]		
Business or postal address line 2			
Suburb	[redacted]		
State	[redacted]	Postcode	[redacted]

Part 3 – Land details

- You must accurately describe the location of the land where your clearing is proposed.
- Provide copies of associated documents registered against the Certificate of Title (limitations, interests, encumbrances or notifications) where the clearing may impact them (i.e. caveats within freehold Lots).
- If you have a large number of properties, please provide the relevant details for each property in a separately attached supporting document.

I have a large number of properties and have given the relevant details in an attached supporting document.	☒ Yes ☐ No

If 'No' – complete the following:

Land description Provide the following details, as applicable, for all properties: – volume and folio number – lot or location number(s) – crown lease or reserve number – pastoral lease number – mining tenement number	**See the attached Property List, as attached to the NVCP Cover Letter**		
Street address – Line 1			
Street address – Line 2			
Suburb			
State		Postcode	
Local government area(s)			
Land zoning			

Part 4 – Relationship to landowner

Tell us which of the following options best describes you as the person completing and submitting this form. If you are filling out this form on behalf of the applicant, answer this question as though you are the applicant.

Proof of ownership may include:

- a certificate of title
- a pastoral or mining lease
- public authority that has care, control or management of the land
- other form of lease, land tenure or specific arrangement.

Relationship to landowner **(select one of the following options)**	**Complete the following**
☐ I am the landowner	☐ Attach proof of ownership
☐ I am lodging a form on behalf of the landowner (e.g. a consultant)	☐ Attach proof of ownership
☐ I am acting on the landowner's behalf and will be jointly responsible for the clearing permit (i.e. joint form)	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to act on their behalf and acknowledge they will be jointly responsible for the clearing permit
☒ I am likely to become the landowner	☒ Attach evidence of the pending transfer of ownership, including details of current proprietor on certificate of title, and/or contract of sale ('offer and acceptance')
☐ I will undertake the clearing activities with the landowner's authority and will be the permit holder	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to access and clear native vegetation within the property(ies) as detailed in section 3.1 (if the applicant is not the landowner)
☐ I am a person with multiple land parcels within which clearing is proposed	☐ Attach proof of ownership and/or ☐ Attach letters, in which the landowner authorises you to access and clear native vegetation within the properties as detailed in section 3.1 (if the applicant is not the landowner)
☐ I will undertake the clearing activities through the exercise of power conferred by different legislation (e.g. the *Energy Operators (Powers) Act 1979*)	☐ Provide relevant legislative details:

Part 5 – Proposed clearing

5.1 Maps and/or spatial data

Select which map type(s) you will attach with your form. Note: DWER/DMPE will decline/return forms (as applicable) if you do not provide sufficient information for this question.	☒ An ESRI shapefile with the following properties (preferred) • Geometry type: polygon shape • Coordinate system: Geocentric Datum of Australia (GDA) 2020 (geographic latitude/longitude) • Datum: GDA 2020 ☒ An aerial photograph or map with a north arrow, clearly marking the proposed clearing area Note: • An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj • You must provide an ESRI shapefile if the form requires an assessment under an *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, "clearing of 5 hectares".
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, "clearing of 10 trees". If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m^2	Area of circle = 3.14 x $radius^2$
1 acre = 0.4 hectares/4,000 m^2	Area of a rectangle = length x width
1 tree = 0.01 hectares/100 m^2	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	**485.55 ha**
Footprint of clearing (hectares) (purpose permit only)	**1,148.16 ha**
Number of individual trees to be cleared	**N/A**

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.). If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).	The proposed clearing is required to facilitate the staged development of the Ngarluma Green Energy Park (NGEP), a large-scale renewable energy and green industry precinct on Ngarluma Country near Karratha. The Green Energy Park is intended to support utility-scale renewable energy generation and associated infrastructure, including solar photovoltaic (PV) facilities, battery energy storage systems (BESS), electricity transmission infrastructure, and supporting industrial uses. The clearing will also enable geotechnical investigations within the application area to inform detailed design and construction of the proposed infrastructure. The development is structured as a multi-user precinct, with Ngarluma Aboriginal Corporation (NAC) acting as the head lessee and sub-leasing discrete development areas to proponents for individual renewable energy and industrial projects.
Specify what the final land use will be after clearing	The proposed clearing under the NVCP relates primarily to initial development areas required for Phase 1, including (but not limited to) solar PV arrays, central hub infrastructure, and associated access, laydown and service corridors.

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 30 September 2026 End date: 30 September 2028

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt Interim Biogeographic Regionalisation for Australia (IBRA) bioregions has been extensive. DWER/DMPE strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?	**X** Yes – complete section below X I have had a pre-application meeting with DWER/DMPE
Insert date of meeting and officer name(s):	NGE has been in discussions with DEED Representative [redacted] NGE's legal representative [redacted] has been in liaison with [redacted] and [redacted] (Green Energy Approvals) DWER in May 2026, via email correspondence and telephone.

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DMPE will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DMPE as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	Avoidance of impacts has been incorporated into the project design through site selection, master planning and exclusion of sensitive areas. Key avoidance measures include: • NAC has commissioned Aboriginal heritage and biological surveys to identify significant values within the clearing footprint. The surveys are currently being finalised and will be provided to the Department once available. The results will be used to further implement avoidance measures to mitigate impacts on Aboriginal Cultural Heritage and environmental values and to ensure the proposed clearing does not cause significant environmental impacts on Ngarluma country. • Exclusion of creek lines and hydrologically sensitive areas from development - All creek lines and flood-prone areas identified through hydrology assessment will be retained as no-development zones • Retention of a significant proportion of native vegetation - Approximately 58% of the broader lease area will be protected from clearing, with

	development limited to up to 42% of the lease area • Spatial planning of development areas - Development is confined to designated sub-blocks within the Green Energy Park masterplan - Clearing is targeted to specific areas required for solar PV, infrastructure and associated facilities, avoiding unnecessary disturbance • Protection of environmentally sensitive vegetation - Areas supporting Priority Ecological Communities (PECs), particularly higher quality PEC 1 areas, will be avoided where practicable. • Avoidance of heritage values - Known heritage areas (e.g. artefact scatters) will be avoided through exclusion zones and cultural heritage management planning • Use of existing infrastructure corridors and disturbed areas where possible - Development layout considers existing infrastructure alignments (e.g. roads, transmission corridors) to minimise new disturbance • Retention of buffer zones - Greenbelts will be maintained along major roads (e.g. Great Northern Highway) to reduce visual and environmental impacts
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	Where clearing cannot be avoided, a range of mitigation measures will be implemented to minimise environmental impacts. Key mitigation measures include: • Minimisation of clearing footprint - Clearing is limited to the minimum area required to support solar PV infrastructure, central hub facilities and associated NGEP infrastructure - Additional disturbance for infrastructure corridors has been minimised through efficient layout design • Removal of grazing pressure post-development - Areas brought under lease for development will no longer be grazed, allowing retained vegetation to stabilise and recover • Hydrology-informed design - Site layout has been informed by detailed hydrological modelling to avoid flood-prone areas and reduce erosion and sedimentation risks • Progressive environmental management - Ongoing monitoring programs will be implemented, including longitudinal flora and fauna surveys facilitated by NAC Rangers • Protection and management of retained vegetation - Large areas of native vegetation (including approximately 2,200 ha) will be protected from disturbance and grazing - Exclusion zones will be clearly defined and enforced during construction and operation • Fauna management - No significant fauna constraints were identified; however, ongoing monitoring will be undertaken during operations - Habitat retention will be maximised through avoidance measures • Cultural heritage management - Identified heritage areas will be managed through avoidance and implementation of a Cultural Heritage Management Plan (CHMP) • Construction management controls - Establishment of designated access tracks and laydown areas to limit disturbance - Implementation of standard controls for dust, erosion and sediment

	• Stakeholder-informed design - Project design has incorporated consultation with key stakeholders to reduce potential impacts (e.g. traffic, glare, land use compatibility) • Appropriate weed management practices will be implemented to prevent the spread of weeds into adjacent vegetation. Areas temporarily cleared for construction will be rehabilitated to their pre-clearing condition. • Additional mitigation measures may be identified once survey results are available and the department's assessment finalised.

6.2 Offsets

Do you want to submit a clearing offset proposal with your form?	☐ Yes ☒ **No**
If 'Yes' – please complete and attach Appendix A of the *Clearing of native vegetation offsets procedure* guideline as a supporting document for your form.	☐ Appendix A attached

Part 7 – Surveys for assessments (ISA)

Do you want to submit marine or biodiversity surveys in support of your form?	☐ Yes ☒ **No – skip to Part 8**

7.1 Biodiversity and Marine surveys

If you want to submit any biodiversity or marine surveys to support this form, you must submit them via Environment Online and follow the Procedure - – Preparing Data Packages for the Index of Surveys for Assessments (ISA) at https://environmentonline.dwer.wa.gov.au/article/?code=KA-00081#/ and https://environmentonline.dwer.wa.gov.au/article/?code=KA-00098.

If you do not meet the ISA requirements, DWER/DMPE will decline/return your form.

Please provide the ISA number(s) in the space provided. Please note DWER/DMPE will suspend the assessment timeframes for your application until the biodiversity or marine surveys are accepted by ISA.

Have you submitted all the biodiversity surveys that support this form to the Index of Surveys for Assessment via Environment Online?	☐ Yes ☒ **Not applicable**
If 'Yes' – please provide the ISA number(s)and/or any relevant existing IBSA/IMSA numbers	**N/A**

Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DMPE will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's guidance on the assessment bilateral agreement.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process, such as the assessment bilateral agreement or accredited assessment?	☐ Yes ☒ **No – skip to Part 9**
Is your proposed clearing a controlled action? If 'Yes', please make sure you have entered all the mandatory details in the Annex C7 form	☐ Yes EPBC number: **N/A** ☐ Annex C7 form attached ☒ No (DWER/DMPE cannot assess the application under an EPBC Act Accredited Process)
List the controlling provisions identified in the notification of the controlled action decision	**N/A**

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DMPE) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.

Has the proposed clearing or any related matter been referred to the EPA?	☐ Yes Enter details: **N/A** ☒ **No – complete question below.**
If 'No' – do you intend to refer the proposal to the EPA?	☐ Yes – intend to refer (proposal is a 'significant proposal') ☐ Yes – intend to refer (proposal will require a section 45C amendment to the current Ministerial Statement)

	☐ No – a current valid Ministerial Statement applies Enter Ministerial Statement number: **N/A** ☒ **No – not a significant proposal**

9.2 Other approvals – works approval, licence or registration (Part V Division 3 of the EP Act)

Have you applied or do you intend to apply for a works approval, licence, registration or an amendment to any of the above, under Part V Division 3 of the EP Act? It is an offence to perform any action that would cause a premises to become a prescribed premises of a type listed in Schedule 1 of the Environmental Protection Regulations 1987, unless that action is done in accordance with a works approval, licence or registration. For further guidance, see DWER's *Procedure: Prescribed premises works approvals and licences* and *Guideline: Industry regulation guide to licensing*.	☐ Yes Application reference: **N/A** ☐ No – a valid works approval applies ☐ No – a valid licence applies ☐ No – a valid registration applies ☒ **No – not required**

9.3 Water licences and permits (*Rights in Water and Irrigation Act 1914*)

Have you applied or do you intend to apply for: • a licence or amendment to a licence to take water (surface water or groundwater) • a licence or amendment to a licence to construct wells (including bores and soaks), or • a permit or amendment to a permit to interfere with the bed and banks of a watercourse? For further guidance on water licences and permits under the *Rights in Water and Irrigation Act 1914*, see DWER's *Procedure: Water licences and permits*.	☐ Yes ☐ No – a current valid licence applies Licence number: ☒ **Not applicable**

9.4 Planning and other approvals

Has the proposal obtained all relevant planning approvals and/or have you applied for all relevant planning approvals (e.g. Development Approval, Extractive Industry Licence, etc.)?	☐ Yes Enter details: ☐ No – planning approval is not required ☒ **Not applicable – please see cover letter for further details**
