GOVERNMENT OF
WESTERN AUSTRALIA

CLEARING PERMIT

Granted under section 51E of the Environmental Protection Act 1986

Purpose Permit Number:	3033/2
Duration of Permit:	From 1 August 2009 to 31 July 2021
Permit Holder:	Latent Petroleum Pty Ltd

The Permit Holder is authorised to clear native vegetation subject to the following conditions of this Permit.

PART I - CLEARING AUTHORISED

1. **Land on which clearing is to be done**
   Pipeline Licence 80 (PL80)

2. **Purpose for which clearing may be done**
   Clearing for the purposes of gas pipeline construction, temporary gas processing plant, maintenance road, and associated activities.

3. **Area of Clearing**
   The Permit Holder must not clear more than 16.2 hectares of native vegetation. All clearing must be within the areas shaded yellow on attached Plans 3033/2A and 3033/2B.

4. **Clearing not authorised**
   Clearing authorised under this permit shall not exceed 20 metres in width.

5. **Period in which clearing authorised**
   The Permit Holder shall not clear any native vegetation after 31 July 2016.

6. **Application**
   This Permit allows the Permit Holder to authorise persons, including employees, contractors and agents of the Permit Holder, to clear native vegetation for the purposes of this Permit subject to compliance with the conditions of this Permit and approval from the Permit Holder.

PART II - MANAGEMENT CONDITIONS

7. **Dieback and Weed control**
   When undertaking any clearing or other activity authorised under this Permit, the Permit Holder must take the following steps to minimise the risk of the introduction and spread of *weeds* and *dieback*:

   (i) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
   (ii) ensure that no *dieback* or *weed*-affected soil, *mulch, fill* or other material is brought into the area to be cleared;
   (iii) restrict the movement of machines and other vehicles to the limits of the areas to be cleared; and
   (iv) only move soils in *dry conditions*.

8. **Retain vegetative material and topsoil, revegetation and rehabilitation**
The Permit Holder shall:

(a) retain the vegetative material and topsoil removed by clearing authorised under this Permit and stockpile the vegetative material and topsoil in an area that has already been cleared;

(b) prior to undertaking works pursuant to Condition 8(c), backfill the pipeline trench with excavated material;

(c) within 12 months following clearing no longer being required for the gas pipeline construction, temporary gas processing plant and associated activities, lay the vegetative material and topsoil on the cleared area;

(d) within two (2) years of laying the vegetative material and topsoil on the cleared area in accordance with Condition 8(c) of this Permit:

(i) engage an *environmental specialist* to determine the species composition, structure and density of the area *revegetated* and *rehabilitated*; and
(ii) where, in the opinion of an *environmental specialist*, the composition structure and density determined under Condition 8(d)(i) of this Permit will not result in a similar species composition, structure and density to that of pre-clearing vegetation types in that area (applicable to vegetation types K1, K2, K3, K4, S1, W1, W2, W3, KD1, KD2 and KD3 as identified and mapped in the report titled *'Warro Gas Pipeline Vegetation Survey, Latent Petroleum Limited, November 2008'*, retained on Department of Mines and Petroleum File A0438/200901), *revegetate* the area by deliberately *planting* and/or *direct seeding* native vegetation that will result in a similar species composition, structure and density of native vegetation to pre-clearing vegetation types in that area and ensuring only *local provenance* seeds and propagating material are used.

(e) where additional *planting* or *direct seeding* of native vegetation is undertaken in accordance with Condition 8(d)(ii) of this permit, the Permit Holder shall repeat Condition 8(d)(i) and 8(d)(ii) within 24 months of undertaking the additional *planting* or *direct seeding* of native vegetation.

(f) where a determination by an *environmental specialist* that the composition, structure and density within areas *revegetated* and *rehabilitated* will result in a similar species composition, structure and density to that of pre-clearing vegetation types in that area, as determined in Condition 8(d)(i) and (ii) of this permit, that determination shall be submitted for the *CEO*'s consideration. If the *CEO* does not agree with the determination made under Condition 8(d)(ii), the *CEO* may require the Permit Holder to undertake additional *planting* and *direct seeding* in accordance with the requirements under Condition 8(d)(ii).

PART III - RECORD KEEPING AND REPORTING

9. **Records to be kept**
The Permit Holder must maintain the following records for activities done pursuant to this Permit:

(a) In relation to the clearing of native vegetation authorised under this Permit,

(i) the location where the clearing occurred, recorded using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
(ii) the date that the area was cleared;
(iii) the size of the area cleared (in hectares);
(iv) purpose for which clearing was undertaken; and
(v) the dates on which the construction of the gas pipeline and temporary gas processing plant were completed.

(b) In relation to the *revegetation* and *rehabilitation* of areas pursuant to Condition 8 of this Permit:

(i) the location of any areas revegetated and rehabilitated, recorded using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
(ii) a description of the *revegetation* and *rehabilitation* activities undertaken; and
(iii) the size of the area revegetated and rehabilitated (in hectares).

10. Reporting

(a) The Permit Holder shall provide a report to the Director Operations, Environment, Department of Mines and Petroleum by 31 July each year for the life of this permit, demonstrating adherence to all conditions of this permit, and setting out the records required under Condition 9 of this Permit in relation to clearing carried out between 1 July and 30 June of the previous financial year.

(b) Prior to 31 July 2021, the Permit Holder must provide to the Director Operations, Environment, Department of Mines and Petroleum a written report of records required under Condition 9 of this Permit where these records have not already been provided under Condition 10(a) of this Permit.

DEFINITIONS

The following meanings are given to terms used in this Permit:

CEO means the Chief Executive Officer of the Department of Environment Regulation or an officer with delegated authority under Section 20 of the *Environmental Protection Act 1986*.

dieback means the effect of *Phytophthora* species on native vegetation;

direct seeding means a method of re-establishing vegetation through the establishment of a seed bed and the introduction of seeds of the desired plant species;

dry conditions means when soils (not dust) do not freely adhere to rubber tyres, tracks, vehicle chassis or wheel arches;

environmental specialist means a person who is engaged by the Permit Holder for the purpose of providing environmental advice, who holds a tertiary qualification in environmental science or equivalent, and has experience relevant to the type of environmental advice that an environmental specialist is required to provide under this Permit;

fill means material used to increase the ground level, or fill a hollow;

local provenance means native vegetation seeds and propagating material from natural sources within 50 kilometres and the same Interim Biogeographic Regionalisation for Australia (IBRA) subregion of the area cleared;

mulch means the use of organic matter, wood chips or rocks to slow the movement of water across the soil surface and to reduce evaporation;

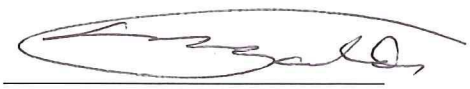

planting means the re-establishment of vegetation by creating favourable soil conditions and planting seedlings of the desired species;

regenerate/ed/ion means re-establishment of vegetation from in situ seed banks and propagating material (such as lignotubers, bulbs, rhizomes) contained either within the topsoil or seed-bearing *mulch*;

rehabilitate/ed/ion means actively managing an area containing native vegetation in order to improve the ecological function of that area;

revegetate/ed/ion means the re-establishment of a cover of *local provenance* native vegetation in an area using methods such as natural *regeneration*, *direct seeding* and/or *planting*, so that the species composition, structure and density is similar to pre-clearing vegetation types in that area;

weed/s means any plant -
(a) that is a declared pest under the section 22 of the *Biosecurity and Agriculture Management Act 2007*; or
(b) published in a Department of Parks and Wildlife Regional Weed Summary, regardless of ranking; or
(c) not indigenous to the area concerned.
