Referral determination

The Department of Water and Environmental Regulation has considered the above referral and determined under section 51DA(3) of the *Environmental Protection Act 1986* (the EP Act) that a clearing permit **is required** for the proposed clearing of the areas cross-hatched orange on the attached map detailed in Schedule 1 (the referral area).

The reason for this determination is that the proposed clearing does not satisfy all of the criteria specified in s.51DA(4) of the EP Act. Specifically, there are known or likely significant environmental values identified within the referral area and there are issues that would likely require conditions to manage or mitigate the effect on the environment.
